

TIMBER & LACQUER FINISHES

TRENZSEATER's collection is available in a number of exclusively developed timber & lacquer finishes designed to give you a sophisticated, luxurious finish to your product. These unique finishes have been applied by craftsmen using both the best of traditional techniques along with advanced modern methods to the highest standard, delivering a superior finish.

TIMBER LACQUER FINISHES

Our timber product which has a clean lacquered finish is stained, followed by a two-pack acid catalyzed sealer as a hardener followed by a number of lacquer top coats.

TIMBER WAXED FINISHES

Our timber product which has an aged, waxed finish is stained, followed by a sealer coat as a hardener followed by a number of lacquer top coats and then finishes using Liberon Black Bison Dark Oak wax to give a beautiful patina to the timber finish.

TIMBER OILED FINISHES

Our timber product which has an aged, oiled finish is stained followed by a coloured oil coating which is then finished using Liberon Black Bison Dark Oak wax. The oiled finishes have a more natural appearance to the timber than our other finishes.

The waxed + oiled product can be periodically maintained with Liberon Black Bison Dark Oak to ensure the finish keeps it's beautiful patina along with touching up any scuffs and light scratches.

LACQUERED FINISH

Our lacquered product follows the same system starting with a double undercoat to ensure a smooth perfect finish to the surface and then finished with a number of lacquer top coats to the desired gloss level.

TRENZSEATER also has the capability to tailor the finish on our product for a particular project to your specific requirements.

IMPORTANT NOTE: For technical printing reasons, the colours displayed below may vary from the swatches in store, it is recommended to view these to get a true representation of the colour before ordering.

PRODUCT CARE: Please visit www.trenzseater.com for all our product care information regarding our product, if you have any queries please contact TRENZSEATER.

TRENZSEATER's collection of product is available in a number of exclusively developed timber & lacquer finishes designed to give you a sophisticated, luxurious finish to your product.

These unique finishes have been applied to the highest standard to ensure a superior finish to your product using only the finest of methods. Our timber product which has a non-aged lacquered finish is stained, followed by a two-pack acid catalyzed sealer as a hardener followed by a number of lacquer top coats. Our aged waxed finish is done the same way, but it finished with a wax topcoat to give a beautiful patina to the timber.

Our lacquered product follows the same system starting with a double undercoat to ensure a smooth perfect finish to the surface and then finished to the desired gloss level.

The waxed product can be periodically maintained with Liberon Black Bison Dark Oak to ensure the finish keeps it's beautiful patina along with touching up any scuffs and light scratches.
